HDMI ARC Audio Extractor

- ARC Enabled: Extract audio signal from ARC (Audio Return Channel) enabled HDTV to analogue stereo output, for audio receiver/amplifier/headphones
- Support PCM 2.0, Dolby 5.1, DTS 5.1 audio downmix to 2 channel stereo audio output
- CEC Pass Through
- 2 Year Warranty

The Lindy HDMI ARC Audio Extractor is an effective solution for extracting audio from a HDMI source to both digital and analogue audio devices, while sending the video signal to a 4K display or projector.

The extractor supports high quality 4096x2160@30Hz resolutions with additional pass-through support for CEC, to allow source devices to be controlled from a TV control, and HDCP 1.4, this is ideal for use with source devices such as set top boxes, games consoles and Blu-Ray Players.

This audio extractor allows output to HDMI and analogue via L/R connections, ensuring seamless compatibility with an amplifier, sound bar or 2-channel speaker setup. With support for multi-channel audio including DTS: HD and Dolby Digital 5.1, this device will ensure an impressive three-dimensional surround sound performance to compliment films, games and music when connected to an audio device. The 3.5mm analogue connection ensures 2-channel speaker set ups can also be connected to the extractor, perfect for use with PC monitors which may require separate speakers.
