Cooler Master is launching a new addition to the CryoFuze Series of thermal paste, CryoFuze Violet. Featuring a purple tinted compound, nanoparticles within the composition allow for excellent thermal conductivity on all processing components. The balanced viscosity and electrically insulated composition delivers exceptional bonding with effortless application and clean up. CryoFuze Violet is non corrosive and oxidation resistant leaving contact surfaces unharmed, as well as preventing solidification and drying. CryoFuze Violet has a versatile range of temperature performance, maintaining stability from -50°C up to 240°C.
